

X12J Purpose and Scope Statement

X12J is responsible for the technical integrity of Accredited Standards Committee (ASC) work products developed by the subcommittees.

X12J's scope includes the following responsibilities and activities:

- Coordination of activities related to requests for revisions to the X12 EDI Standards and American National Standards
- Verification that approved design rules, guidelines and syntax rules are adhered to in all subcommittee development and maintenance
- Development and maintenance of X12.61 EDI Design Rules and Guidelines
- Maintenance of X12.3 Data Element Dictionary and X12.22 Segment Directory
- Development and maintenance of interpretations related to X12J work products
- Review and approval of formal interpretations developed by other ASC subcommittees

Document History
