

X12I Purpose and Scope Statement

X12I is responsible for the development and maintenance of components of the X12 EDI Standards related to the transportation industry's business activities, including air, marine, rail, and motor freight transportation and Customs, logistics and multi-modal activities. X12I also develops and maintains interpretations, technical reports and guidelines related to its areas of responsibility.

X12I's scope includes the following responsibilities and activities:

- Development and maintenance of X12 EDI Standards including transaction sets, segments and elements related to the transportation industry's business activities
- Development and maintenance of interpretations, technical reports and guidelines related to the transportation industry's business activities
- Review of externally-developed work products which are related to the transportation industry's business activities for processing as official X12 products, including standards, guidelines or technical reports
- Providing X12 technical liaisons to other organizations involved in activities related to the transportation industry
- Promoting the use of X12 Standards and supporting work products across the transportation industry
