

## **X12-03 ICE Subcommittee Mission**

The Initialize, Cultivate, and Explore Subcommittee (ICE) operates within the Registered Standards Committee and is available to serve as the initial and temporary home for groups or activities that do not clearly align with the mission of another RSC group and therefore need a launching pad within the RSC.

Groups shall operate within the ICE until they are either established as a subcommittee, established as a subordinate group of a subcommittee, or discontinue their association with the RSC. Activities shall be conducted within the ICE until they are either assigned to an established group or discontinued.
